A. COURSE DESCRIPTION

Credits: 4
Lecture Hours/Week: *.*
Lab Hours/Week: *.*
OJT Hours/Week: *.*

Prerequisites:
This course requires all four of these prerequisites
BIOL 1211 - Introductory Biology I
BIOL 1212 - Introductory Biology II
STAT 2610 - Applied Statistics
BIOL 3362 - Stream and River Ecology

Corequisites: None

MnTC Goals: None

Theory and methods of fisheries management with an emphasis on quantitative methods and ecosystem management. Lecture and extensive field and laboratory work. Prerequisites: BIOL 1211, BIOL 1212, BIOL 3362, and STAT 2610. BIOL 4534 strongly recommended.

B. COURSE EFFECTIVE DATES: 08/26/1997 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Introduction, Statistics SPSS & R- t-tests, ANOVA's, Regressions, Chi-square
2. Collect fish, otolith extraction, aging (scales, otoliths, cleithra)
3. Growth, food habits
4. Collect fish
5. Mortality
6. Population estimates
7. Fish health assessment
8. Creel survey methods
9. Fecundity, Recruitment, Production
10. Spawner-recruit models, MSY, OSY, MEY, mortality caps
11. Stock assessments
12. Types of fisheries
13. Culture techniques
14. Management paradigms, Managing people
15. Managing habitat and fish

D. LEARNING OUTCOMES (General)

1. develop understanding and skills for assessing fish populations and stocks.
2. develop understanding and skills for analyzing fisheries statistics, e.g., growth, mortality, fecundity, recruitment.
3. develop general understanding and skills in managing fisheries.
E. Minnesota Transfer Curriculum Goal Area(s) and Competencies
   None

F. LEARNER OUTCOMES ASSESSMENT
   As noted on course syllabus

G. SPECIAL INFORMATION
   None noted
