## ENGR 1000: Introduction to Engineering and Design

### A. COURSE DESCRIPTION

Credits: 3

Lecture Hours/Week: \*.\*

Lab Hours/Week: \*.\*

OJT Hours/Week: \*.\*

Prerequisites: None

Corequisites: None

MnTC Goals: None

This course is designed for people interested in learning about the engineering profession. It provides an overview of the engineering disciplines. A project-based approach will be used to give experience in skills, tools, and problem-solving methods associated with completing engineering design solutions.

**B. COURSE EFFECTIVE DATES:** 08/27/1997 - Present

### C. OUTLINE OF MAJOR CONTENT AREAS

1. The engineering disciplines; traits of the successful engineer; engineering duties and functions; methods of problem-solving; common graphical and analytical tools/techniques; the Engineering Design process.

### D. LEARNING OUTCOMES (General)

1. Identify a need and develop a corresponding problem definition statement (Course Goals 1 & 3; NHCC ELOs 1, 2)
2. Develop criteria and constraints regarding possible design solutions. (Course Goals 1 & 3; NHCC ELOs 1, 2)
3. Do research into previously-generated solutions. (Course Goals 1 & 3; NHCC ELOs 1, 2)
4. Develop a series of design alternatives. (Course Goals 1 & 3; NHCC ELOs 1, 2)
5. Analyze design alternatives relative to identified criteria and constraints. (Course Goals 1 & 3; NHCC ELOs 1, 2)
6. Make a choice as to which design alternative to further pursue. (Course Goals 1 & 3; NHCC ELOs 1, 2)
7. Be able to clearly communicate in writing and orally the results reached in an engineering design project. (Course Goal 2; NHCC ELO 2)

### E. Minnesota Transfer Curriculum Goal Area(s) and Competencies

None

### F. LEARNER OUTCOMES ASSESSMENT

As noted on course syllabus

## **G. SPECIAL INFORMATION**

1. Knowledge of Human Cultures and the Physical and Natural World --Through study in the sciences, mathematics, social sciences, humanities, histories, languages, the arts, technology and professions.
2. Intellectual and Practical Skills - Including: Inquiry and analysis; Critical and creative thinking; Written and oral communication; Quantitative literacy; Information literacy; Teamwork and problem solving.
