The effort is to inform students on many issues and areas of human endeavor, both local and global, in order to promote critical and educated thinking and communication around peace and conflict. Some study of cultural difference surrounding economic, political, religious and sociological perspectives is crucial to demonstrating how understanding is a necessary foundation for peace-making. Students will learn about changes in personal philosophies of life, conflict resolution, mediation and non-violent strategies for peace-making through studying specific peace-makers and peace organizations as well as case studies of successful non-violent change or conflict resolution.
